

## **KIPPER** by Renee Edel

Kipper is a 2 year old sorrel mare with a narrow blaze. She has spent most of her life in the remote part of the wild horse range called Monument Rock, so she has not seen many people. I have seen her a few times, and she has always seemed submissive to me, never causing any trouble with the other mares in the band. She also showed a lot of tolerance for two rambunctious colts in the band. She is not very tall or muscular yet, so her size may be perfect for a female or younger rider. If you are looking for a sweet sorrel mare, Kipper would be a great horse to adopt.
